Managing the lifecycle of your assets

WHAT WE DO

YOU CAN

Have a **live Fixed Asset Register?**

Know the **current location** of all your assets?

Assign responsibility for managing and updating the records?

Know what **condition** your assets are in?

Know **how safe** your assets are ? (OHS Act)

Know when they need **servicing/ inspecting?**

Know if the inspection is **actually taking place?**

Manage spares and consumable stock?

Manage your assets using **automated work Orders?**

WHAT THIS WOULD MEAN TO YOU

Reduce costs

Reduces manual data input

Eliminates data entry errors

Theft deterrent

Fewer lost assets

Control risk and compliance

Confirms attendance

Standardise processes

Adherence to Health and Safety Policies

Greater accountability

Improve Customer Service

Quicker asset deployment

Visibility of assets

Electronic documentation

Communication – set realistic expectations

Improve Efficiency

Improves utilisation

Automated process – eliminates paper trail

Common view of assets

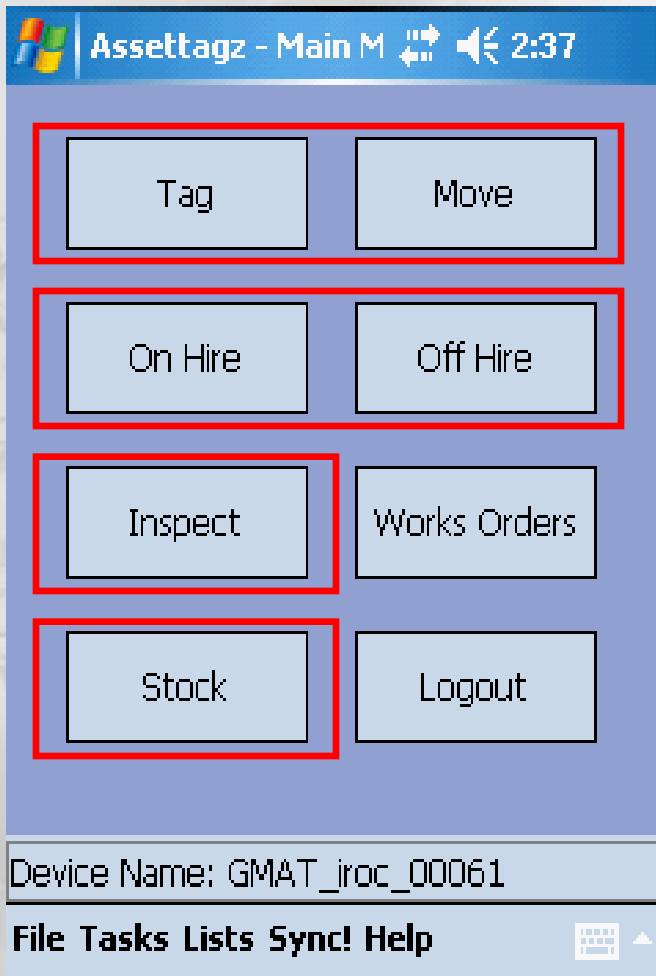

Eliminates paper - environmentally friendly

Sophisticated reporting tools

EFFICIENCY, SAFETY AND COST SAVINGS

ASSETTAGZ INTEGRATION: WEB SERVICES

- The Assettagz Connector uses web services to connect Assettagz to ERP applications using secure Internet protocols (https) to transfer XML messages between Assettagz and the other applications.
- The message transfer can be initiated by the Connector (which can ask for new messages periodically) or by the applications themselves.
- These messages give real-time information about the status of assets of assets to critical ERP business applications (for example SAP, Oracle, JD Edwards, COINS, MCS, Maximo, MiQuest) or other bespoke applications.
- This significantly improves efficiency and ensures clear and accurate communication therefore eliminating unnecessary manual costs.

■ Examples of data that can be

- Asset creation, adjustment and deletion
- Asset movements
- Hire/loan dates and times
- Inspection results
- Stock movements, orders and returns
- Contracts
- Geographical locations
- Users
- Certificates
- Other statutory documentation and reports
